CV

Walid Abdussalam El-Turki

BA (Hons) 3DD I.D, BA (Hons) Arch, Dip Arch RIBA

Address: Doshma -Sidi el Masri-Tripoli - Libya
Email: w@adn-arc.com
Nationality: Libyan / British
DOB: 01.01.1971
Status: Married
Languages: Arabic, English

Profile

Following my formal education at Brunel & Brighton University, I worked with Zaha Hadid Architects on the Phaeno Science Centre competition, before returning to Brighton to complete my Diploma in Architecture, graduating with Distinction in 2001. I worked in the UK, rising to Director level, and in 2003 returned to Libya to start my own practice, the Allabina Architectural and Engineering Consultancy.

Between 2006 and 2011, Allabina developed a diverse range of projects, working with architects such as Zaha Hadid Architects, OMA, Foster & Partners, Atkins and many others. I chaired and was an adviser to different strategic projects including the committee overseeing the design of the main airports (Tripoli, Benghazi, Sabha, Labraq). OMA are a strategic partner and are still active with me in Libya.

Since my election to the RIBA in 2009, I have pushed myself to create better design and construction services in Libya, founding several key design and construction consultancies, the opening of ADN School of Design in 2016, giving me the opportunity to develop young Libyan architects in the philosophy and art that shapes up an architects vision.

Professional Experience

2016 – Present	Founder, ADN School of Design, Tripoli, Libya
2013 – Present	Founder, El-Turki Construction & Real Estate Investments, Tripoli, Libya
2012 – Present	Founder of Libya Design Architecture & Engineering Consultancy

1994 – 1996	Design & supervision of private work in Tripoli, Libya
1993 – 1994	Décor Engineer for Rowland Design – UK/London

Skills

My focus is in early design development: the concept. I have developed a method called the “design birth process”, describing a journey of design. It begins with literature extracts from a selected text, and continues through a course of nine actions. Upon the completion of each action, a design idea is described in both text and drawings as it evolves in the mind, each action relating primarily to its precedents and increasing in detail and complexity as it is developed. It is a rigorous process that accumulates steadily, and is an approach that can be applied to art and architecture. This has been developed in the Adn School of Design.

Key Roles

2007 – 2012	Local consultant for Zaha Hadid Architects, peoples conference Hall, Tripoli Libya
2008 – 2011	Local consultant for Foster and Partners, Tripoli line, mixed use development, Libya
